1. Student Progression

In the student progression section school will do the progression of the student. In this type of progression are valid as explained below:-

- If a student is studying in class 4 then by doing the progression of the student we will promote the student to the next class i.e. class 5. Otherwise, we will mark it as a repeater in student progression.
- If a student is studying in class 4 and the student fails an examination we will mark it as a repeater in student progression.
- If a Student is studying in primary school (1-5). In this condition, we will mark the student as passed out or moved to another school.

In this case, when the student is admitted to another school, they will use the same student code of the passout school for the new student enrollment in the student information section in the student module.

Step 1: School will log in using selecting the user type as a school after entering the udise code along with the password login to the portal as shown below: -

Using the following login screen,

- Choose the radio button for **School**.
